Re: Roach Hunt Partnership Website

Thank you for your email the other week.

I can confirm that we are very happy indeed with our web site that you designed for our practice. The directions page is particularly helpful when arranging meetings at our office with new clients.

It is not easy for anyone to enter another company's profession and attempt to understand in a short time, what the company does, who it deals with, and how it needs and wants to be presented to the outside world. Mark Greenway was particularly good at doing precisely that – so well done.

We also like the inbuilt ability of being able to update the site ourselves, so again, well done to you on selecting appropriate software solutions that keep our practice's website current with our practice's completed projects, present projects and future work.

We do not have a problem including this testimonial on you website or within your brochure.

Yours sincerely,

HEPZIBAH HUNT
